Section I (Briefings)

Collection Status Review

2. [] explained that the briefing originally scheduled on today's agenda had been, in essence, the DIA first quarter 1970 status briefing provided to the JCS last April. Since an updated briefing covering the second quarter of 1970 would be presented to the JCS next week, [] suggested that he give that briefing at the next COMIREX meeting in lieu of the one scheduled today.

Section II (Approval of Minutes)

COMIREX-M-100

1. COMIREX-M-100 covering the COMIREX meeting of 11 June 1970 were approved with two changes. Revised pages reflecting the changes are to be distributed to all holders of COMIREX-M-100. /Revised pages 6 and 13 subsequently distributed 16 July 1970, [] 2248-70/1./

2. The Chairman, EXSUBCOM, explained that the target list referred to in paragraph 2 of the draft memorandum to the Director, NPIC, and the DIA Member, COMIREX, was last reviewed by EXSUBCOM on 2 April and must be updated in light of the situation existing at the time any airborne reconnaissance of the Middle East is scheduled. In its present form the list contains 307 exploitation targets--152 first-phase and 155 second-phase.

3. The guidance provided in COMIREX-D-29.3/1A was approved by COMIREX with the understanding that a current list of NIETB Middle East targets would be included when it was transmitted to DIA and NPIC. When the guidance is sent to the field for use in contingency planning, it should be made clear that the accompanying target list is subject to continuing review and would be updated as necessary in time of actual need.

4. The CIA Member asked about the countries included in the term "Middle East" and explained that an attempt had been made to list those countries on which requirements had been submitted by the Community.

Basic Exploitation Program - FY 1971 (COMIREX-D-31.6/2A/1A)
(T-KH)

5. After distributing copies to the members, explained that the proposed Basic Exploitation Guidance Manual had been designed to simplify the procedures for approving and maintaining requirements in the basic exploitation program. The Manual will contain presentation instructions, readout requirements, EEI's, etc. It is to be maintained by the EXSUBCOM but any organization can request COMIREX to review any part of the guidance at any time. The Subcommittee views the Manual as being a highly flexible and dynamic instrument in that the guidance can and will be changed any time the situation warrants. The loose leaf format makes it an easy matter to substitute revised pages reflecting changes.

25X1A

25X1A

6. [REDACTED] provided an explanatory briefing on the Manual's format and use. There was considerable interest on the part of members in the plans for preparing the statements called for in Section A of the Manual on the national intelligence needs which are being supported as a service of common concern by the Basic Exploitation Program. Both [REDACTED]

[REDACTED] felt these statements, which are understood to be in the initial stages of preparation, would be valuable in providing an identification of general substantive intelligence problems being dealt with as opposed to mere listings of individual targets of interest.

[REDACTED] noted that cooperation of intelligence analysts in all participating agencies will be required to enable EXSUBCOM to prepare meaningful statements. [REDACTED] noted that DIA is in the process of devising a Master Target Plan and he agreed to make this available when completed.

7. The Chairman, EXSUBCOM, explained that the target lists, which will be maintained separately from the Manual, will list targets both by COMIREX number and [REDACTED]. They will be maintained on a current basis by members of the EXSUBCOM staff as changes are coordinated within EXSUBCOM. Each fiscal year's program will be an ongoing continuing operation with EXSUBCOM constantly reviewing requirements for the current year as well as for the ensuing year and making changes in the target list as considered necessary. The FY 1971 Basic Exploitation Requirements and production assignments so far processed and approved by EXSUBCOM are listed in the paper before the Committee today for approval and would be included in the Manual. (See Tab D-3)

8. [REDACTED] distributed two statistical summaries on the FY 1971 Basic Program for the information of members. The first provides information on the number of targets on which initial reports and updates are to be prepared for each NTP Functional Category by quarter (see Tab D-1), and the second shows the reports to be produced by geographic area (see Tab D-2).

9. The Chairman, EXSUBCOM, recommended that COMIREX approve: (a) the concept of the Basic Exploitation Guidance Manual as the formal means for expressing and maintaining COMIREX-approved basic exploitation requirements; (b) those FY 1971 Basic Exploitation Requirements so far processed and coordinated within EXSUBCOM as listed in Tab A of COMIREX-D-31.6/2A/1A (see Tab D-3); and (c) forwarding of the FY 1971 tasking assignments to the appropriate imagery interpretation elements as proposed in Tab B of that document.

10. The Committee agreed that the EXSUBCOM and members of the EXSUBCOM staff were to be commended for their work on this project. In approving the three separate parts of the action listed in paragraph 9 above, there was an understanding that EXSUBCOM was authorized to coordinate and distribute subsequent portions of the Manual without referral to COMIREX for approval in each case. With regard, however, to the contents of Section A of the Manual (Intelligence Needs), these statements when formulated should be referred to COMIREX for review before being made a part of the Manual (see paragraph 6 above). Further, it was agreed that EXSUBCOM member agencies are to have the option of having any problem in connection with the Manual specifically referred to COMIREX for action.

Status of Standard Imagery Target Definitions (SITD's) (T-KH)

11. During discussion of the FY 1971 Basic Exploitation Program, the question of the status of SITD's was raised. [REDACTED] noted that a special meeting had been set up for this afternoon with DIA and the NPIC publication element on related matters and a similar meeting is to be scheduled later with IEG/NPIC.

12. Since COMIREX approval for the production of a selected sample of SITD's last September (see COMIREX-M-78, Section IV, paragraph 16) applied only to the FY 1970 Basic Exploitation Program, it was agreed that discussion of the evaluation of the SITD's produced and decision concerning their inclusion in the FY 1971 Basic Exploitation Program will be considered at the next COMIREX meeting.

[REDACTED] Film Distribution Requirements (COMIREX-D-34.5/1A)

[REDACTED] T-KH, C, [REDACTED]

13. [REDACTED] of the NRO and representatives from the film processing organizations at Bridgehead and Westover met with representatives of the exploitation components on Tuesday, 7 July. The meeting was quite helpful in that it permitted the persons concerned with the various facets of the [REDACTED] film distribution question to get a better understanding of each other's needs and problems. Two problem areas were identified, one concerning the requirement for two different sizes of film rolls and the other the need for another [REDACTED] mission simulation. Though it is possible to provide the film on two different size rolls, the NRO is studying the cost factor and will report back. [REDACTED] noted the figure is about one-half million dollars more per year for four missions. [REDACTED] pointed out it would be useful also to have for comparison the costs to exploitation organizations that would result, based on equipment problems, etc., if they were unable to obtain their film rolls in the required size.

14. With regard to the need for another simulation exercise, [REDACTED] said that he plans to use the second reference mission simulation (see COMIREX-M-93, Section V, paragraph 10 and TCS-10426-69/2) to provide breakdown instructions to the processors using a format developed at Tuesday's session. This would enable the processors to provide a comparative assessment based on compositing coverage in two different ways.

15. [REDACTED] reported further he hoped to receive in August the simulation of a "typical mission" based on two-and-one-half years of simulation building and representing, to the best of the NRO's ability, a "typical" bucket from [REDACTED]. Receipt of this third [REDACTED] simulation will be followed by another exercise within EXSUBCOM to study the impact and another session sometime in September similar to that last Tuesday. The Chairman asked what the NRO would use as the mission-to-mission guidance factor in preparing the third simulation

task group made up of representatives from each interested department or agency to do the preliminary staff work and drafting. Even though in many instances the person most likely to be designated by an agency to serve on such a group would be its SDWG member, this should not necessarily be the case. He asked that the most senior knowledgeable person in each component be assigned for this task wherever possible.

19. [] stressed that the task group should include representation from the services as well as from DIA and State. [] felt there was merit in having a group other than SDWG undertake the initial collation of data and staffing for the study. He emphasized, however, the availability of SDWG for whatever support might be needed.

20. The establishment of the special task group suggested by [] will represent the Chairman in monitoring the work of the team. /See COMIREX-D-2, 2/2 for implementing action./

Section V (Other Business)

Introduction of New CIA Member and Alternate

1. The Chairman welcomed [] as the new CIA Member of COMIREX commenting that [] was already well known to members because of his long association with COMIREX and with ICRS. He also introduced and welcomed [] who will serve as the Alternate CIA Member. [] noted with regret that [] was not at today's meeting. The Chairman had hoped that he and others present could express to [] personally their views on the exceptional service he has

probably be expended against ICBM sites, the primary priority targets for this mission. The Chairman asked that ICRS review this point very carefully and provide ground rules for holiday coverage on ascending portions of the orbit.

10. [] noted that the average altitude with an 88-mile perigee will be 94 miles whereas with a perigee of 100 miles the average altitude would be 105 miles. This 11-mile decrease in average altitude should give about a six-inch-better resolution (from eight and one-half feet to eight feet). He also stated he was encouraged to learn that NPIC was determining a resolution threshold where eight-foot resolution was significantly better than eight-and-one-half-foot resolution.

11. [] noted ICRS will meet next Tuesday to establish priorities for Mission 1111 (see Section VI, paragraph 1).

NRO Response to Request for Accelerated Launch Schedule

25X1A

25X1A

[] T-KH, C, []

12. The Chairman reported receipt of a memorandum from [] confirming the forward rescheduling of CORONA Mission 1111 to a planned launch date of 22 July 1970 in response to the pressing intelligence need for additional imagery in support of NIE 11-8-70 (COMIREX-D-14.2/7). [] also indicated, however, that it would not be possible to fill in the subsequent gap in the CORONA schedule with an additional launch, which COMIREX had requested be considered. The NRO must adhere []

[] and would be unable to draw on the reserve CORONA's needed for this in order to fill the 112-day gap between KH-4 Mission 1111 as rescheduled and Mission 1112 scheduled for 18 November 1970.

Coverage of TAGBOARD Planning Targets []

[] T-KH, TAG)

13. [] reported that it is his understanding the TAGBOARD mission approved for June is still on hold at the request

Cuba Coverage Accounting Procedures

(S)

NRO
25X1
25X1D

NRO
25X1

25X1A

25X1A 14. [] noted that the DIA Member of ICRS
has reported the criteria established by COMIREX in April 1970
(see COMIREX-M-93, Section IV, paragraphs 1-3) for recording
acceptable coverage on Cuba by OLD HEAD missions, has proven
very satisfactory for CINCLANT purposes. Initially CINCLANT
had indicated some concern as to the application of the criteria,
but there have been no problems to date. NPIC is doing quite
well on their review and scoring of usable coverage.

Possible Requirement for OLD HEAD Coverage

(S)

25X1A 15. [] referred to a report concerning an area
in Cuba which has been put under tight security restrictions so that
indigenous personnel could not go into the area, the inference being
that some new equipment might be coming in. [] noted that
such a report should be brought to the immediate attention of the OLD
HEAD mission planners. The Chairman reminded members that one
of the explicit provisions of the current guidance on coverage of Cuba
was maintenance of a capability to fly against special problems as they
arise. [] will provide information on this report to []

Section VI (Subcommittee and Working Group Reports)

Imagery Collection Requirements Subcommittee (T-KH)

25X1A

1. [redacted] reported that ICRS will meet next Tuesday, 14 July, to work out specific guidance to the NRO in terms of ascending photography, repetitive coverage, and priority requirements for Mission 1111. /Subsequently issued as COMIREX-D-14.12/17, 15 July 1970./ (See also Section V, paragraphs 9-11.)

Exploitation Research and Development Subcommittee (T-KH)

25X1A

25X1D

2. [redacted] reported on EXRAND's involvement in the Community's joint procurement of 389 AIL 1540 light tables for [redacted] film exploitation. This has resulted in savings in three areas: (a) direct saving of [redacted] operations manuals and packing and shipping costs; and (c) ability of Air Force to obtain eight more tables [redacted] than anticipated for the funds allotted.

NRO
25X1
NRO
25X1

3. The Chairman stated that EXRAND is to be commended on this achievement and should be encouraged to continue its excellent work in this field.

25X1A

4. [redacted] asked whether changes were made in the procurement pattern and whether there would be delivery delays. Colonel Burger replied that the Community, through NPIC, has now gone with a single manufacturer who is to deliver 145 units by the end of December. A distribution schedule has been developed based on modifications required by some of the users.

<u>Date</u>	<u>Mission</u>	<u>Areas</u>	<u>Remarks</u>
16 Jun	C-080	Offshore along China mainland coast in the Taiwan Strait, East China Sea, and South China Sea area.	Relatively cloud-free photography obtained. ChiCom fighters observed in possible reaction to the mission.

Coverage of Special Targets in South China and North Vietnam

a. Surveillance Coverage on Lines of Communication (LOC) Targets to Detect Introduction of Chinese Forces into North Vietnam (see COMOR-D-25/207, 4 March 1966). The number of LOC priority targets in South China and North Vietnam remains at 320. There was no surveillance coverage reported for the period 11-24 June. For the period 25 June - 8 July 1970, surveillance coverage was reported on the 24 priority targets listed on page C-5.
